

Installazione e configurazione Agent

Per avere un server nel backup cloud Italia, si deve installare l'agent.

Il link per avere l'agent e come installarlo è questo:

<https://kb.arubacloud.com/en/backup/backup-agents/install-backup-agents.aspx>

Importanti sono i dati da inserire durante la registrazione:

Web-based Agent Console address: r1-it1.backup.cloud.it **Utente:** CRM2019DS0022@cloud.it **Password:** quella fornita per il cloud backup(vedi connessioni clienti)

Esempio Linux

- Download the Backup Agent:

for 32bit systems

```
wget http://agents.backup.cloud.it/agents/Agent-Linux-7.20.5420.tar.gz
