

Creazione cartelle condivise

Nella sezione Domain del UCS trovate Share. E' molto importante che i diritti siano Administrator come utente owner e Domain Admins come gruppo. Questo server per gestire facilmente gli accessi tramite il Secyrity tab delle cartelle in Windows.

wp

Name *

backup.schein.ig

Host *

/var/shares/windows-profiles

Directory *

Administrator

Directory owner of the share's root directory

Domain Admins

Directory owner group of the share's root directory

Permissions for the share's root directory

	Read	Write	Access
Owner	☒	☒	☒
Group	☒	☐	☒
Others	☒	☐	☒
		Setgid	Sticky bit
		☐	☐

Nel caso explorer di windows facesse crash, allora controllare gli acl di quella cartella in ucs(esempio sotto) tramite:

```
getfacl /mnt/3di
```

Il contenuto deve essere così:

```
# file: opt/3di/  
# owner: Administrator  
# group: Domain\040Admins  
user::rwx  
group::r-x  
other::r-x
```
