

Come creare Utenti VPN nel Firewall Watchguard

1. Creare Gruppo per VPN SSL

2. Impostare i campi come le preferenze.

3. Scegliere l'autenticazione

Mobile VPN with SSL

When you activate Mobile VPN with SSL, the "SSLVPN-Users" group and the "WatchGuard SSLVPN" policy are created to allow Mobile VPN with SSL connections from the Internet to the external interface.

Activate Mobile VPN with SSL

General Authentication Advanced

Authentication Server Settings

Select one or more authentication servers. The first server in the list is the default authentication server.

SELECT	AUTHENTICATION SERVER
<input checked="" type="checkbox"/>	Firebox-DB (Default)

DEFAULT

Auto reconnect after a connection is lost

Force users to authenticate after a connection is lost

Allow the Mobile VPN with SSL client to remember password

Define users and groups to authenticate with Mobile VPN with SSL. The users and groups you define are automatically included in the "SSLVPN-Users" group.

<input type="checkbox"/>	NAME	TYPE	AUTHENTICATION SERVER
<input type="checkbox"/>	SSLVPN-Users	Group	Any
